

Results and Benefits

This map demonstrates that most activities which involved an exchange of information are executed in almost any possible order. This indicates that well-established routines are not in place in this instance.

Sneak-peek into the future

Armed with this data, the next steps towards reducing readmission is a person-centred approach at the hospital. Although tension exists between the require-

ments of operational efficiency and demands of a person-centred care approach towards discharge, readmission incurs its own costs human and financial .

About Apromore
